

# THE GLEICHEN CALL

VOLUME 42 NO. 49

Published as second class mail, GLEICHEN, ALBERTA, WEDNESDAY MARCH 1, 1950

SUBSCRIPTION \$2.00 PER YEAR

## In The Provincial Legislature

By G. E. BELL, M.L.A.

With the opening of another session it is my intention to again supply through the columns of this paper a weekly account of some of the highlights of what transpires in the Legislative Assembly.

I want to express my sincere appreciation to the editor of this paper for providing this space in order that you may become better acquainted with some of the things that your government is doing.

This year's session witnessed the largest crowd that has been on hand at an opening since 1935. Alberta's new Lieutenant-Governor, the Honourable J. A. Brown, performed for the first time and read the speech from the throne. His approach to the parliament buildings was marked by a strong gun salute and the playing of the Air Force Band. The Guard of Honor was escorted to the Assembly room at 2 o'clock by Premier E. C. Manning.

For the first time the opening and reading of the Speech from the Throne was broadcast on the radio. The Speech from the Throne indicates some of the major matters to come before the Legislature. Due to the rapid expansion of the oil industry, and increased revenue as a result, larger expenditures were forecast for the year.

A revolving fund is to be established to aid school districts in part of their costs for new buildings. More new highways and bridges are forecast as well as increased grants for municipalities, hospital districts and education.

During 1949 nine new oil strikes were made in the province, and considerable expansion and development in the oil fields such as Bowdler and Leduc. It is the Government's policy to continue to see that these resources are developed in such a way as to benefit all of the people of the province.

An aerial photograph has been taken of the entire forested areas of the province. This will give valuable information helpful in forest and soil conservation, road building, etc. The government is urging the extensive planting of more trees by Alberta residents in 1950.

The Alberta Memorial Sanatorium is to be completed in 1950, and a T. B. Unit built at the Oliver Institute Hospital will be introduced to make possible the establishing of rural government on a county basis. Under this set-up the municipal, hospital and hospital affairs would be handled by one body. Some areas of the province have asked to be established as such a body, but no action will be taken to establish them where there is not a request from the people involved.

Health control legislation forecast for the Session will provide a competent body to act as a referee between landlords and tenants where the two parties cannot reach a mutual agreement on their own.

The motion to adopt the Speech from the Throne was moved by Mr. Andy Aalberg of Alexandria, and seconded by Mr. Wm. Kovach, Government member from Crowfoot. Mr. Aalberg quoted from many sources indicating the wide publicity Alberta is receiving today for her development and her recognized sound economy. He indicated that the main road had been hard-surfaced from the Saskatchewan border to Kitcoy. This program is likely to be extended during 1950.

Mr. Kovach from Crowfoot, urged the necessity of a national coal policy to provide an outlet for more Alberta coal. He claimed that Canada was spending 10 million dollars each year to buy American coal, whereas Alberta coal could be secured from Alberta. It would help the railway business as well as provide more employment for Canadians. He hoped this matter would be discussed at the next Dominion Provincial conference.

### CUT DOWN FARM FIRE LOSSES

Before this year comes to an end, fire will destroy 600,000 worth of Canadian farm property, statisticians predict. Scores will be left homeless. A large number of adults and children will never see the dawn of next year. Their charred bodies will be found among the smoldering ruins of what had been happy homes.

A rural fire is infinitely more terrifying than one in an urban center where fire brigades are not far away.

### ENGLISH BY SHROT WAYE

This is one of the latest developments at CBC International Service headquarters in Montreal, coming just as the "Voice of Canada" celebrates its 50th anniversary of its inauguration. This picture shows Sonia Wollett and Sonia Brown, both of the Swedish section of the International Service, sorting part of a day's mail from listeners in Sweden. Gunnar Bagge, in charge of the Swedish program, said: "Any fears we may have had about the popularity of the course have been dispelled. Already over 2,500 enquiries have arrived and more are coming in daily."

When a farm building catches fire the best that can usually be mustered is a bucket brigade of neighboring farmers who are willing but often helpless. It is vital, therefore, that every farmer institute his own fire protection program.

To check the quick spreading flames, curtains and other fabric materials in the home can be treated with certain flame proofing materials. Fire retardant paints are now on the market. Inexpensive fire extinguishers can be hung in easily accessible places about the house and barn.

Out breaks of fire can be prevented if a few simple rules are followed. Keep basements, attics and subcellars free of rubbish. Store gasoline and other inflammable liquids at a safe distance from main buildings. Provide a safe place to dispose of hot ashes from stove or furnace. Which the careless smoker should be kept near every building using kerosene when starting a stove fire. Be sure hay is well cured before putting it in the loft unless there is a safe mow cutting system. Install the lightning rod system once a year. If there isn't one it would pay in the long run to have one.

Each spring and fall check over chimneys and flues for cracks that could permit flames to reach other parts of the house. A ladder long enough to reach the top of the highest building on the farm should be kept in a handy place. If there is a water system, a few well placed hose connections are good protection. If not a barrel of water painted red should be kept near every building and used only in case of fire.

If the statistics mentioned in the first paragraph could be halved or eliminated altogether, we're positive the statisticians won't mind being wrong in the prediction. In fact they'll be extremely pleased.

### One Man Alone

What can one man alone accomplish against the world? Lost in this tiny planet whirling in the darkness of space, stifled by the growing complexities of a civilization still close to savagery, battered by the struggle for existence, what can one man do to keep alive the spark or human generosity and kindness amidst the coldness of the world?

By joining his hand with others a man can see realized the good he wishes to perform. By cooperating with others a man can help to stem the currents of misfortune and ill luck that overwhelm many.

Red Cross is a channel for the kindest impulses of each one of us. It is this great co-operative effort, this response from one heart in concert with millions that makes the Red Cross a living symbol of mercy. Each year Red Cross extends the opportunity to every one of us to do something to help others, and in the last analysis, to help ourselves. Through its medium we express Canada's generosity to other peoples of the world in dire need; we help our neighbor when misfortune strikes; we lay the foundations for the better health and well being of our own citizens and the coming generations.

That's why we say, as the annual Red Cross appeal starts "Give generously! Give from the heart!"

Britain's war with France in 1895 was partially paid for by a tax on hachettes.

## Master Merit Award is Won By Local Man

Mr. M. A. Palmer of the Alberta Pacific Grain Co. (1943) Limited at Shoultice has gained the distinct honor of being numbered amongst those who have won the elevator Master Merit Certificate. This is an award given by the Grain Insurance and Guaranty Company in recognition of outstanding proficiency in the maintenance of grain elevator premises. To earn this an elevator agent must have a perfect record for a period of ten consecutive years.

The Grain Insurance and Guaranty Company carries out a very rigid inspection service and the award therefore is recognized as a definite achievement by the grain trade generally.

### FROM THE FILES OF THE CALL

Twenty Years Ago

Ian Maclean of the Bank of Commerce staff has been moved to Provost.

J. Hornby of Calgary arrived in town Monday to examine the school building and his report is expected to reach the school board soon. It is stated the erection of a new school will be the outcome.

Mrs. R. S. Haskayne assisted by Mrs. H. G. Bates entertained at cards under the auspices of St. Andrew's Church. The sum of \$40 was realized for the church.

G. Johnson of Macleod is visiting friends in town.

After an absence of four years Charles Marker has returned to the district. He is on the look out for a farm and hopes to get one south of the river.

Constable A. Batte left on this morning train with his big bloodhound for Oda, where he has been called to trace a man who is believed to have committed a murder.

It is very evident the ratepayers are greatly in favor of town irrigation as indicated by a petition that is being circulated with that aim in view during the past week to be presented to the town council asking that a by-law be submitted. Up to Monday night 71 ratepayers had signed the petition and there are 10 more resident ratepayers who have a right to sign. Of these 16 have not been seen, while a few have asked for more time in which to consider the matter before signing and only two have refused to sign.

The C.P.R. has announced that the railway line at Arrowwood will be completed this year.

### The Ottawa Letter

There are 16,000 persons registered as blind in Canada. About two-thirds of these are receiving pensions for blindness. The departmental examiners find some eligible for pension who are not completely blind. Efforts are made to prevent blindness and good results have been achieved.

talied by such operations as cat-

At present there are 8,000 known drug addicts, the great majority of whom possess lengthy criminal records and are connected with underworld characters. Narcotic supplies are not manufactured in Canada and the addicts must pay exorbitant prices to the traffickers to get their drugs. To get this money, most of them will resort to any criminal activity.

The departmental officers and the Royal Canadian Mounted Police have been very active in rounding up all these addicts. One seizure of 35 ounces of heroin was made in Vancouver. The importer was arrested while trying to dispose of the supply through underworld channels and was fined \$200 and sent to jail for five years.

In Hamilton two persons were charged with selling narcotic drugs to a third party who was accused of robbing a payroll of thousands of dollars. These people were brought up in court and bail set at \$10,000 each. They jumped the bail and were located in Ohio. When the federal officers went to arrest them, a gun battle ensued and the wanted man was killed. The girl was returned to Canada where she paid a fine of \$500 and was sent to jail for two years.

In days gone by, the use of narcotic drugs was generally associated with Orientals. However, during the last year of the 250 convictions, only one Chinese was found guilty, compared with 255 who gave their racial origin as British or American.

It is interesting to note that 178 of the convictions were for the possession or selling of heroin. Only 18 involved opium and 47 involved morphine. This would indicate a preference for the white or patent drugs administered by a needle and that smoking of opium is rapidly becoming a thing of the past.

To stamp out the use of illegal narcotics in connection with race track activities saliva tests were carried out at a number of leading meet- ings by highly qualified men. No positive

## LET NOTHING COME AHEAD OF THIS

First of all, when you are paid, pay yours...

Unfailingly, set aside a definite percentage of your earnings, deposit it in a savings account with us—and leave it untouched.

Then plan to live comfortably on the balance of your earnings.

In this way you are bound to succeed—enjoy life much more, to be independent when independence means most.

Be generous to yourself.

THE CANADIAN BANK OF COMMERCE

GLEICHEN BRANCH J. L. KERR, Manager

reactions were obtained but the R.C.M.P. checked closely all personnel and equipment accompanying race horses entering Canada for narcotics at custom entry points.

Analysts test all Chinese medicine arriving in this country and there is very satisfactory cooperation in the effort to stamp out this traffic with such countries as Britain, U.S.A. and India.

F. W. GERSHAW

## The call that wakes a nation's heart to action

Somewhere in Canada . . . someone in distress, perhaps a little child . . . is calling to you for help . . . through your Red Cross. Answer generously, from your heart! Give to aid in the never-ending work you count on the Red Cross to do. This year, the need is urgent for \$5,000,000. Only you can give your share. Give from your heart . . . and give all you can!

THE WORK OF MERCY NEVER ENDS...

Give from the heart

LOCAL CAMPAIGN HEADQUARTERS, GLEICHEN

OUR COMPLETE SHORT STORY—

# My Mother Told Me

By BARRY MURKAR

I STILL remember the sting of my mother's hand. More clearly, I remember her cry. "Don't ever do that again!"

I was only a kid at the time, but the fear in my mother's voice now lives in my mind forever. Then I could only see that what I had done was something connected with a good sign in the face.

Now as I sit here in this cold cell, looking back on the years, I know only too well that my mother, then in her shabby kitchen, foresaw the path I might take.

How I hate this hole. Only three weeks more and I'll be out of it. Fine again, to walk God's green earth!

"There goes Joe with the guard to see the warden again. Hope Joe gets that parole. He's a good head." By the time I was seventeen I began to realize my extraordinary gift. Wonderful things could be mine—possession, fast cars and fast living habits. My career got off to a good start and it wasn't long before I was flashing a roll. And my first car? Wasn't a cop in the country

## I Was Nearly Crazy With Fieri Itch—

Small I discovered Dr. D. D. Doan's famous kidney pills. I was nearly crazy with a fieri itch. I was nearly crazy with a fieri itch. I was nearly crazy with a fieri itch.

## COME OUT FROM UNDER THE SHADOW OF PAIN

Dr. DOLCIN Tablets for women, relief from ARTERIO-SCLEROTIC and RHEUMATIC PAIN. ... get a bottle of 100 or 500 tablets. TODAY and join the thousands of relieved sufferers who by taking DOLCIN have come out from under the shadow of pain...

## Well Covered

## Fourth In The West Million Dollar Sodium Chloride Plant Produces All Types Of Salt

REGINA.—A new and modern addition to the industries of northern Saskatchewan is a \$1,000,000 sodium chloride plant near Unity, 337 miles northwest of Regina. Employing 35 men, it is the only industry of its kind in the province. All types of salt, including fine grain for table use, high-quality for meat packing, and salt in both loose form and compressed blocks for livestock feeding, are manufactured.

Owned by the Dominion Tar and Chemical Co. Ltd., the plant is the fourth of its kind to be constructed in western Canada. Pioneers in developing new salts, the company constructed the first salt plant in western Canada at Waterways, Alta. The Unity plant, which produces 125 tons of salt per day, obtains its power from the natural gas fields in the vicinity. Its operation requires more gas than is used by the remainder of the town which has a population of over 1,000.

## Estimate 14,000,000 People in Canada

OTTAWA.—Canada's population, at the current rate of expansion, should hit 14,000,000 before 1950 ends. The Bureau of Statistics estimated that the population increased by 71,000 during the three months ended December 1, last, touching 13,977,000. During the previous three months the increase was 57,000 making an estimated six-month jump of 138,000.

The bureau said provincial population changes were not available. However, these will show in the annual estimate of population June 1.

## Report United States Dumping Potatoes Back On Farms

WASHINGTON.—The United States government began "dumping" some 25,000,000 to 40,000,000 bushels of surplus potatoes back on the farm at practically giveaway prices just to get rid of them. Potatoes which cost the government \$1.25 a bushel on a national average under price support programmes will be sold back to the farmer at one cent a hundred pounds.

Initiative is originality in motion.

## Urges Dairy Farmers On Sales Program

EDMONTON.—P. E. Reed of Regina urged dairy farmers to support a publicity and sales promotion program to advertise their products, boost sales and increase the standard of relations between consumers and producers.

**ELECTRONIC SCALE DEVELOPED TO WEIGH LIVESTOCK**

An electronic scale for weighing livestock at public markets permitting greater accuracy and speed eliminating nearly all possibility of error. Inaccurate weights have been developed. The new scale measures the weight of livestock through electrical impulses and records pressures electrically. When certain buttons are pressed, it prints automatically the weight, number and type of animal, names the weigher and selling price, and the date and type of animal. It is so constructed that it is impossible to register anything other than the weight of the load

actually on the scale platform, and it is accurate to within five pounds on loads up to 30,000 pounds.

The device was developed by an aircraft instrument company, working under contract with the department under the research and marketing acts of 1946. The work was supervised by the livestock branch of production and marketing association. The company previously had produced electrical strain gauge cells which are the basic features of the device and had used them in scales for weighing aircraft. Much modification of the aircraft scale was required to adapt it to use for weighing livestock, and extensive tests and trials at markets were necessary to assure dependability and accuracy of the changed mechanisms under all weather conditions.

Errors of several kinds are possible with the conventional weighing type of scale. Dirt accumulations, wear and corrosion tend to reduce accuracy. Dirt and manure on the scale platform are reflected in the weights recorded, unless the scale is frequently rebalanced. Rocks interfering with the weight beam also may cause error amounting to several hundred pounds. In addition, carelessness or intentional manipulation of the scale by the weigher could produce an erroneous weight record unless the scale is frequently rebalanced. Weight values indicated on the weigh beam ordinarily can be read only at very short distances.

With the new scale, the weight is indicated on a large dial, easily readable from 10 feet away. Rebalancing of the scale to allow for ac-

cumulations on the platform can be accomplished simply by pushing a button.

The electronic scale costs more than conventional scales, but its far greater speed in weighing animals, its higher accuracy, and other points of superiority are believed to more than counter-balance the extra cost. Some managements already are planning to install scales of this type.

### Town & District

Mrs. A. Stave is at present confined to a hospital in Calgary having undergone an operation, Saturday.

While getting out of a car Mrs. J. Collins slipped on the icy road and broke her ankle in two places. At present she is in a Calgary hospital.

Saturday five rinks of Gleichen lady curlers attended the Beaumont hospital. To rink skipped by Mrs. J. Brown won first prize and Mrs. J. Wilson the consolation. The ladies report they had a grand time in the eastern town.

Mr. and Mrs. Klipp Schmidt of Calgary spent Sunday in town visiting the former's parents, Mr. and Mrs. W. Schmidt, and their many friends about town.

Sunday was the warmest day we have had since the middle of December. This time we had a real chinook that lasted for some hours during the week and caused the snow to melt rapidly and streams of water was running every where. The weather has been cooler since with some snow flurries.

Col. Wm. Taylor of Trail, B.C. spent a few days in town last week visiting his parents, Mr. and Mrs. E. W. Taylor. Bill had been up at Wainwright for some days with the troops going through the winter training work. He says he enjoyed the outing even though the weather was cold.

Mr. and Mrs. Robert Taylor of Calgary spent the week and in town visiting the former's parents. Bob is on the staff of the C.F.R.

W. J. Phyllis entered the Belcher hospital in Calgary last week. He had not been feeling very well of late.

Patient—"I say doctor, don't you think it would be a good idea if I were to pack up and go to some place where the climate is warm?" Doctor: "Good heavens! Isn't that just what I've been trying to prevent!"

**ENGAGEMENT ANNOUNCED**

Mr. and Mrs. Alex Dunn of Calgary, announce the engagement of their youngest daughter, Mary, to Mr. George Elliott Evans, youngest son of Mr. and Mrs. G. W. Evans of Gleichen. The marriage will take place April 8th, in Central United Church, Calgary.

**EDWARD R. HARPER COMMISSIONED RADIO OFFICER**

The promotions of four Chief Petty Officers of the Electrical branch of the Royal Canadian Navy to the rank of Acting Commissioned Radio Officer has been announced from Ottawa. One of them Acting Commissioned Radio Officer Edward R. Harper was born in Gleichen, later living in Seabach, B.C. He joined the R.C.N. as a Boy Seaman in October 1938, and after completing his early training at Esquimalt, served on board the destroyer H.M.C.S. Beaugouin until September 1939.

He then specialized in wireless telegraphy and for the next six years served in various shore establishments and at sea in the auxiliary cruiser H.M.C.S. Prince Robert, the frigates Ponton and La Hagar and the mine sweeper Chignecto. In July 1947, he transferred from Petty Officer Telegraphist to Radio Technician, specializing in the repair and maintenance of radio and radar equipment.

Mr. Harper recently completed an 11-week course at R.M.C. Electrical School, Halifax, qualifying him for promotion to commissioned rank. He is at present serving in H.M.C.S. Stadacona, Halifax.

### New Chrysler Models Announced

Wider trends, new rear fender and moulding treatment, massive new design bumpers and grille, together with the greatest all-round visibility ever offered are distinguishing features of the new Chrysler models now on display at Chrysler-Plymouth-Fargo dealers.

A Club Coupe is available in the Chrysler Windsor series as well as the 4-door Sedan shown above.

Both these models provide Presto-Matic driving as standard equipment.

In the Chrysler Royal series there is a 4-door Sedan, Club Coupe and 2-passenger sedan. The Chrysler Royal models have Chrysler Fluid Drive as standard equipment with Presto-Matic transmission available as optional equipment. All Chrysler models with Presto-Matic drive eliminate shifting gears in practically all driving.

**"I'll be glad to see the last of dirty ashes once we get OIL HEAT!"**

Have a cleaner, more comfortable home. And have time to spare for those extra things you want to do.

Heat and cook with oil and banish time wasting tending fires, and extra cleaning caused by ashes and dirt. Use Esso Domestic Heating Oil in space heaters, furnaces, automatic oil burners, hot water heaters, stoves, stock trough heaters and chicken brooders.

See your oil burner equipment dealer for installation and service. Contact your nearest Imperial Oil Office or Agent for your supply of dependable Esso Domestic Heating Oil.
